Pharmaceutical companies may encounter challenging life experiences that interfere with the pursuit of their marketing goals and/or consumers satisfactions.

## WHO WE ARE ?

FFCC is state-of-the-art pharmaceutical and cosmetic consultancy centre functioning in the areas of formulation development, pre-formulation studies and product registration-pack provision.

## WHY FFCC?

- Our academic counsellors at FFCC are available to assist pharmaceutical companies to solve formulation problems during pre-formulation studies at pilot scale as well as during large scale production.
- Our experience in the system of postgraduate professional education and the long-term dialogue with pharmacists allowed us to identify several unresolved issues.
- Our drug development experts having international industrial expertise and competences will significantly increase the value of your development projects.
- With realistic assessment of data and regulatory requirements we can create the best possible development that helps bring products into the market and maintain them.
- **Assistance is offered for a wide range of concerns.**
- **Confidentiality is guaranteed within legal and ethical guidelines.**

## OUR VISION

Recognize and reward Excellence in Cosmetic and Pharmaceutical development consultancy services from being the First Academic based Formulation Consultancy Centre to becoming the Regional Spearhead industrial oriented Innovation provider.

## OUR MISSION

- Help newly established cosmetic and pharmaceutical companies to perform their studies.
- Determine formulation problems.
- Provide different scientific based ways to solve formulation problems.
- Provide an up-to-date technology for both cosmetic and pharmaceutical formulations.
- Provide stability indicating assay and compatibility studies.
- Provide a suitable balance between product cost and its quality.
- Preparation of the full registration packs required by Ministry of Health and Central Administration of Pharmaceutical Affairs.

## AREA OF EXPERTISE

Our counseling unit experts have hands-on experience in the pharmaceutical industry; research and development, formulation problem solving and product registration packs. We offer guidance and documentation services in most drug development disciplines across a broad range of cosmetic and pharmaceutical formulations.
