Vision

- Launch a public awareness campaign about 'Thyroid Disorder and Anemia.'
- Awareness about the importance of following healthy Life style.

Event Details

Under the supervision of the Community Service Festival of Future university, an awareness campaign for thyroid disorder and anemia was held as a guide for thyroid diseases and anemia. As asymptomatic disorders of thyroid or anemia are common among population, so it is important to provide medical awareness with healthy life style recommendations.

Online meetings with team members and heads: Bahaa Tarks (EPSF President) and Doha Fayez (chairperson of public Health committee), under supervision of Dr. Asmaa Mandour, discussing the aim of the campaign creating new ideas in order to elevate team members medical knowledge. For the sake of giving valuable advice and gurantee perfect awareness for different audience in population. Also, all details was discussed regarding members distribution and tasks during the compaign.

A team composed of 30 students participated in the awareness among the whole period of the compaign. It's worth noting that the compaign timing coincides the first mid term exams also theoretical lectures, that's why not all the members could attend. An attendance list with the duration of participation was recorded by (IR member) Menna Nassar.

Different ways of attraction were available and members were ready to provide awareness to more audience, using hand-

made materials prepared by Yomna Ayman, Sherry Esmaa & Reem osama. Also, illustrations of a blood drop and thyroid disorder symptoms were used.

Flyers were distributed among audience which included Types, Symptoms, Risk Factors and Identification of the Disease prepared by Arwa Farag.

The members were divided into groups and each group was assigned to a different site at the university.

The Audience included not only students but also Faculty members and workers.
